SUMMARY

Motivated Final-year CSE student with hands-on experience building and deploying **AI/ML prototypes**, **RAG pipelines**, and interactive **Gradio** dashboards. Demonstrated ability to ship live AI applications end-to-end on HuggingFace Spaces - from data modelling to deployment - within short sprints. Proficient in **Python**, **Scikit-learn**, **Pandas**, with practical exposure to transfer learning, vector search, and classical ML workflows.

EDUCATION

SKIT

2023 – Present

B.Tech CSE - CGPA - 7.75

Jaipur, Rajasthan

Maheshwari International School

CBSE - Class 10th: 80.4% — Class 12th PCM: 85.6%

Kishangarh, Rajasthan

TECHNICAL SKILLS & COURSEWORK

Programming Languages: Python, C, C++, SQL, JavaScript

AI/ML Tools: PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, LangChain, ChromaDB, Imbalanced-learn

Frameworks & Databases: Flask, Gradio, Streamlit, MySQL

Developer Tools: VS Code, Git, GitHub, Jupyter Notebook, Google Colab, HuggingFace

Core Subjects: DSA, ML, OS, DBMS, AI, OOPs, Prompt Engineering, RAG

Operating Systems: Windows, Linux

PROJECTS

Bean Leaf Disease Classifier 🔗 | Python, PyTorch, EfficientNet-B0, Gradio, HuggingFace 04/2026

- Trained **EfficientNet-B0** via two-phase transfer learning on the HuggingFace Beans dataset (1,034 images) to classify angular leaf spot, bean rust, and healthy leaves.
- Achieved **84% test accuracy** and **88% validation accuracy**; inference under 100ms (CPU) with per-class F1 scores up to 0.89.
- Launched on HuggingFace Spaces via Gradio with pre-loaded example for quick testing without uploads.

RAG Document Q&A 🔗 | Python, LangChain, ChromaDB, Groq API, Gradio 04/2026

- Engineered an end-to-end **RAG** pipeline for document Q&A, achieving under 3s response times by integrating PDF ingestion, chunking, embedding, and ChromaDB storage.
- Grounded **Llama 3.3 70B** responses using retrieved context via cosine similarity, achieving 88% validation accuracy and ensuring factual grounding.
- Deployed on HuggingFace Spaces with an interactive Gradio UI; surfaced retrieved source chunks alongside every answer to ensure full response traceability.

CineVerse 🔗 | Python, Scikit-learn, NLTK, Spacy 09/2025

- Developed an AI-powered **Movie Recommendation and Review Platform** with modules for **sentiment analysis** and **hate speech classification**.
- Built **sentiment analysis** (91% acc, 50K reviews), and **hate speech classification** for (86% acc, 700K samples).

INTERNSHIP

Playtown Studios 🔗

07/2025 – 08/2025

AI/ML Intern

Jaipur, India

- Implemented and compared **4 classical ML algorithms** (Random Forest, Decision Tree, Naive Bayes, Logistic Regression) using Scikit-learn and Imbalanced-learn on datasets of **50K+ records**.
- Enhanced overall model accuracy by **14%** through parameter tuning and data balancing techniques.
- Gained hands-on experience in Python, Pandas, NumPy, and Matplotlib while optimizing end-to-end ML workflows over 45 days.

CERTIFICATIONS & EXTRACURRICULAR

- Google AI Essentials – Coursera
- Generative AI Mastermind – GrowthSchool
- Google Prompting Essentials – Coursera
- GFG 160 Days DSA – GeeksforGeeks
